

HAVEN INSTALLATION

- Compatible with most farrowing crates
- Allows for easy access or viewing of your piglets
- Designed to stay on the wall for effortless cleaning and weaning

WE ARE COMMITTED

FarrPro is committed to creating **efficient** and **effective** solutions for animal environments. As native Iowans, our team understands the farmers' immense impact on **local** and **global communities**. We also understand the hardships and frustrations they face daily. We are devoted to making piglets warmer, safer, and healthier - so farmers can focus on feeding their communities, the world, and their success.

THE PERFECT MICROCLIMATE
FOR NEWBORN PIGS **HAVEN™**

FARRPRO

HOW MUCH DOES LOSING ONE PIGLET COST YOU?

We get it. You are tired of old, inefficient, harmful technology like heat lamps costing you viable piglets and profits every year. That's why we created **HAVEN**, a safe and efficient microclimate that evenly distributes heat to your pigs, significantly decreasing the risk of chilled and crushed piglets. With Haven, you can ensure the success of your farm by:

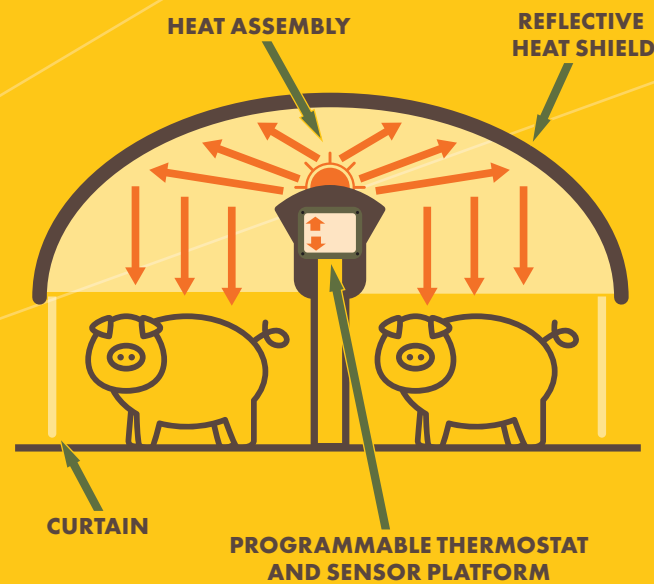

- Producing more viable piglets
- Reducing the piglet mortality rate
- Improving sustainability
- Increasing profits

UNEVEN HEAT CAUSES DISCOMFORT AND STRESS

HAVEN BRINGS THE HEAT AND KEEPS IT!

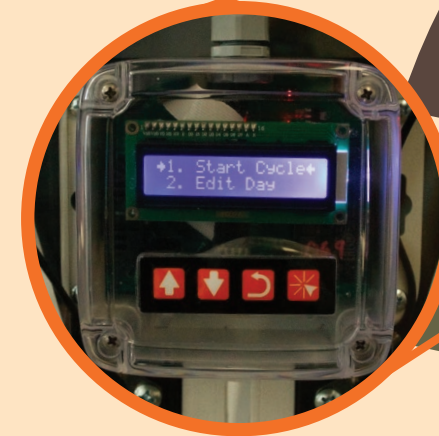

- Curtains ensure a draft-free environment - creating a microclimate for your piglets
 - o Durable construction
 - o Bio-secure
- Modular design- replaceable parts
- Sows are comfortable- increased milk quality and production
- The enclosed microclimate reduces wasted heat ensuring sow comfort
 - o Leads to less money spent on cooling fans

FIELD-TESTED. SCIENTIFICALLY PROVEN.

Studies conducted by Iowa State University showed that **HAVEN** reduces lay on mortality by 33% and cuts energy use by almost 50%

- Reduced pre-wean mortality by over 20%
- Results show additional third pig per litter
- Improved sow comfort resulting in better feed intake and conversion

THE HAVEN CONTROL BOX

- Multifunction displays
 - o Current heat temp under the shield
 - o Heating icon or idle status
- Easy recovery from power loss
- Automatically senses the temperature under the shield
- Maintains an ideal temperature
- 28-day cycle with predetermined temperature control

PRODUCT SPECIFICATIONS
 DIMENSIONS: 52"L x 27"W x 15"H
 WEIGHT: 24 LBS
 WATTAGE: 300 Watts (max output)
 POWER: 115V
